AI Engineer

An AI engineer with foundational hands-on experience in applying data and algorithms to real-world engineering problems. Has worked on building, testing, and iterating AI solutions using computer vision and data analytics, while continuing to learn how these systems behave and improve in practice. Motivated to deepen technical understanding, learn from experienced engineers, and contribute to practical, data-driven systems in manufacturing environments.

Education

University of Economics and Law – VNU HCMC, E-Commerce – Honors Program Sep 2023 – Jul 2027
GPA: 8.89/10 (Expected)

Experience

AI Engineer Intern, N2N AI Solution, Ho Chi Minh City, Viet Nam Jan 2025 – Present

- Contributing to a biomedical AI project in collaboration with Vietnam Military Medical University.
- Developing a YOLO-based computer vision pipeline for sperm motility and concentration measurement.
- Implementing trajectory tracking and heatmap visualization for movement analysis.

Research Associate, Business Analytics & Artificial Intelligence Laboratory (UEL) Oct 2024 – Present

- Applying computer vision and multi-object tracking techniques to biomedical imaging problems.
- Developing an explainable AI model for startup funding round classification.
- Building and evaluating an explainable AI model for startup funding round classification.

AI Engineer / Full-Stack Developer, Innovation AI Lab Dec 2023 – Dec 2025

- Developed a React Native mobile application for forest protection law dissemination in Can Gio mangrove forests.
- Designed front-end and business analysis workflows for an aloe vera farm management application.
- Built an LMS and educational game system on Roblox Studio, integrating round-based learning games using Lua scripting.

Nguyen-Huynh, N. Y., & Le, H. S. (2025). Applying artificial intelligence in data analytics and sustainable development strategies for Vietnamese enterprises according to ESG standards. *Science & Technology Development*

Journal: Economics – Law & Management. <https://doi.org/10.32508/stdjelm.v9i1.1530>

Le, H. S., **Nguyen-Huynh, N. Y.**, Anh, N. N. T., Thu, B. N. A., & Thu, L. H. A. (2024). A proposal of generative AI applications in digital finance. *Science & Technology Development Journal: Economics – Law & Management.* <https://doi.org/10.32508/stdjelm.v8i3.1366>

Awards and Honors

- Second Prize – National Student Scientific Research Competition (Ministry of Education and Training), 2025.
- Second Prize – UEL Young Scientific Researcher Award, University of Economics and Law (VNU-HCM), 2025.
- Excellent Paper Award – 2025 International Conference on Future Information & Communication Engineering (ICFICE), Guam, USA.
- “Five-Good Student” Honor – Vietnam National University, Ho Chi Minh City, 2024–2025.
- Honorary Delegate – Vietnam National Student Association Congress, University of Economics and Law (VNU-HCM), 2025.
- Vallet Scholarship for Academic Excellence, 2025.
- Merit-based Academic Excellence Scholarship (Top Student of Class), 2023-2025.

Skills

Programming: C + + , Python, JavaScript, HTML, CSS, React Native, React JS, SQL

Technical Platforms: Python (PyTorch, Jupyter), SQL, Computer Vision (YOLO), Data Analysis, Automation Tools (n8n), Visualization

Soft Skills: Leadership, Public Speaking Time Management, Communication.

Language: Vietnamese, English (IELTS 6.0)
